2 Product Performance Analysis

**3 Supplier Performance
Analysis**

4 Strategic Recommendations

Overall Revenue & Demand Trend

Revenue has shown a gradual downward trend over the past few months.

Similarly, the total quantity sold has declined, indicating a reduction in overall product demand.

Although sales performance is decreasing, the number of customers remains relatively stable.

This suggests that the issue is not customer loss, but rather:

- A decrease in the average purchase value per customer
- A reduction in order frequency

Additionally, the total number of orders has dropped significantly, highlighting the need for strategic actions to stimulate purchasing activity.

Product Performance Analysis

The analysis shows that only five products generate the majority of total sales:

- Tropic Shield Lichen
- Chaparral Bellflower
- Downy Milkpea
- Labillardiere's Clover
- Mt. Albert Goldenrod

This indicates a strong dependency on a limited number of products.

Such concentration represents a potential risk if one of these key products underperforms.

Supplier Performance Analysis

The top three performing suppliers are:

- Toy Group
- Abshire, Funk and Davis
- Romaguera-Daugherty

The results reveal a noticeable performance gap between suppliers.

This suggests the need to reassess supplier relationships and improve collaboration with lower-performing partners.

Strategic Recommendations

Based on these findings, the company should consider:

- Diversifying its product portfolio
- Launching marketing initiatives to stimulate demand
- Optimizing supplier management
- Strengthening customer engagement strategies

These actions will help ensure business stability and support sustainable sales growth in the future.
